

## Corporate eye care for you

**Visioncare is a group scheme that makes eyewear and eyecare more affordable for employees and their family.**

Employers are encouraged to include Visioncare as part of the staff's remuneration package as a way of assisting staff to have the appropriate eyewear in the workplace.

Employees receive exclusive benefits including preferential pricing and services on all optical needs including the eye examinations, glasses, prescription sunglasses and regular sunglasses and contact lenses.

## Employers

**Visioncare provides you with a flexible, informative and nationwide eyecare staff welfare package to offer your employees.**

The main two valuable uses for Visioncare:

- 1) Use Visioncare to determine your company's policies on staff welfare.
- 2) Determine what cost contributions you may OR may not want to make to the staffs' eyecare. Visioncare will provide your staff and their families benefits either way.

## Employees

**Visioncare means a reduced cost of eyewear and eyecare for you and your family, plus;**

- Improved vision and comfort.
- Boost your self-esteem.
- Improve your efficiency at work.
- Have the correct eyewear for your lifestyle and job.
- Pass on the same benefits to your family members.
