

Visioncare launches NZ-wide corporate eye care

This month sees the launch of a new corporate staff welfare program. Visioncare has been developed as an easy to use, flexible eye care system designed to help companies of all sizes provide the eye care required for their staff.

Peter Gates, founder of Gates Optician in Hamilton, incorporated Visioncare in 2006 and set up a comprehensive New Zealand wide network of optician partners in response to a need identified by large nationwide companies in New Zealand wanting to provide valuable benefits to their staff in a bid to improve staff retention.
